Methodology

Agile Scrum Methodology

EDUCATION

COLLEGE LEVEL

STI College Calamba

BS Information Technology

June 2015 - June 2019

WORK EXPERIENCE

FULL STACK DEVELOPER

Allied Marketing (Los Angeles, California, United States) - Remote
November 11, 2024 - Present

Front-End: Next JS, React JS, Typescript, TailwindCSS, Shadcn

Back-End: NodeJs, Fastify, Express, Supabase, MongoDB

Tools used: Git, Bitbucket, Monday.com, Stripo, EmailOnAcid, Trello, Wordpress, Elementor, Metabase

- Refactored and upgraded legacy applications to improve maintainability and performance.

- Developed and integrated RESTful APIs using Node.js, Fastify, Express, and Supabase.

- Implement client-facing solutions using Next.js, React.js, and TypeScript to deliver high-quality user interfaces.

- Built responsive, high-quality user interfaces with Tailwind CSS and Shadcn.

- Translated designer-provided email designs into responsive, production-ready HTML templates.

- Tested and validated email template compatibility across clients using Email on Acid.

- Collaborated with cross-functional teams using Git, Bitbucket, Monday.com, Trello and Google Workspace.

- Used Metabase to generate and update monthly points statement reports for clients.

- Refactored the company website portfolio using WordPress and Elementor, and implemented SEO best practices using Yoast SEO, with ongoing performance monitoring via Google Search Console.

SOFTWARE ENGINEER

Arxon Solutions. LLC (Roseville, CA, United States) - Part Time
August 12, 2024 - April 2025 (8 months)

Front-End: Next JS, Typescript, TailwindCSS, Material UI, Turbo Repo

Tools used: Git, Github, JEST, Postman, ClickUp, Confluence and Padlet

- Developed large-scale web applications using Next.js, TypeScript, and Tailwind CSS.
- Applied Agile Scrum methodologies to deliver features in iterative sprints.
- Wrote and maintained unit tests using Jest to improve code reliability.
- Managed tasks and documentation using ClickUp, Confluence and Padlet.
- Collaborated with distributed teams using GitHub and Postman for API Testing.
- Led the integration of Bunny streaming platform APIs, modifying existing .NET Core backend services to support frontend functionality.

SOFTWARE DEVELOPER

eMandarin Ventures Inc. (Bonifacio Global City, Taguig) - Onsite
December 12, 2022 - August 19, 2024 (1yr & 8 months)

Front-End: HTML, CSS, JavaScript ES6, VueJS, Vuex, UniApp, Tailwind CSS

Back-End: Java Spring Boot, Spring MVC, MyBatis, Redis, MySQL, Thymeleaf

Tools used: Git, Gitlab, Npm, HBuilder, VSCode, Intellij Idea, DataGrip,

Postman, Termius, Figma

- Led the development of the e-Wallet (PayLoro), specializing in front-end development with VueJS, Vuex, Axios, UniApp and RESTful API integration.
- Collaborated with graphic/web designer to conceptualize the e-Wallet design using Figma, translating wireframes into a user-friendly interfaces.
- Maintained and innovated the Payment Gateway system (SaaS) using Java Spring Boot, Spring MVC, MyBatis, Redis, Thymeleaf, and MySQL, ensuring efficient and effective tracking of business transactions.
- Developed RESTful APIs with Java Spring Boot, utilizing MyBatis for data handling and MySQL for queries. Integrated these APIs with the e-Wallet using Axios and tested endpoints with Postman.
- Payment API Integration from companies like Coins.ph, Bayad Center, NetBank, and StarPay. This involved reviewing API documentation, ensuring compatibility, and integrating with our payment gateway and e-Wallet (PayLoro) using JWT and OAuth 2.0 for secure transactions.
- Developed front-end websites, including QRPH, Checkout Counter, and PayBills pages, integrating them with our payment gateway and e-Wallet using VueJS, Vuex, Axios, and TailwindCSS.
